

ARISE & SHINE

ST. VINCENT PALLOTTI

COLLEGE OF ENGINEERING & TECHNOLOGY, NAGPUR

(Accredited by NAAC with 'A' Grade)

ALUMNI NEWSLETTER

Department of
**Electronics & Telecommunication
Engineering**

Vision

To develop disciplined & ethically strong Electronics & Telecommunication engineers having multidisciplinary knowledge with entrepreneurship & leadership skills to serve the society.

Mission

To hone young minds with knowledge in the field of Electronics and Telecommunication Engineering & related areas with a focus,

- To develop professional competencies through proactive industry collaborations.
- To encourage students for higher studies & research activities.
- To inculcate a spirit of service & a concern for the environment.

HOD'S MESSAGE

Dr. Ashutosh S. Werulkar

It gives me immense pleasure to introduce this platform of Alumni Connect. Alumni are the assets of any educational institute. They always make us proud of their achievements and contributions. Your contributions towards your alma mater in terms of project mentoring, higher studies guidance, organising skilling workshops, sharing industrial experience and their expectations are highly appreciated.

You create a benchmark for all students of the department to follow. The references you create become the targets for our students. Students are always eager to know and listen from the alumni for latest technological developments and trends in the industry. Keep it up.

I hope that this is a stepping stone for an endless journey started through this mission of Alumni connect.

Let's be connected to share your knowledge, experiences and wisdom to your juniors.

ALUMNI MEET 2019

Alumni Meet was organised on 6th April, 2019 in the Department of Electronics & Telecommunication Engineering. Such meetings are conducted to reconnect with alumni and give them a platform where they can share their experience as a professional, celebrate their success and acknowledge their achievements. Their suggestions are also taken into consideration for providing more advanced training to the present students, which will in turn help them in their placement and career.

There were a lot of suggestions from alumni which are given below:

Akhil Madankar

Research Methodology should be part of the curriculum and students should be encouraged for paper publications as experience of research at this level is given weightage when students apply for higher studies like MS. Students should also be give training on professional ethics from future point of view. They should be nurtured to think out of the box so that they can creatively think for their company, they should not be dependent on faculty members completely and must cultivate the habit of self learning.

Students should be given extra inputs, not only about how to crack GATE exam, but also skills like leadership, teamwork, decision making and most importantly communication skills which will make one competent for any kind of job.

Snehal Wairagade
Nice Software solutions

Students should study in depth subjects like microcontrollers and update themselves with latest trends in core companies which work on the areas of embedded systems and VLSI. Advanced topics like PIC and ARM processor with hardware kits should be available for students to study and explore. These are the skills which core companies are expecting from an engineering graduate.

Mayur Kalode
Lear Automotive
India Pvt. Ltd.

Students avoid core subjects which provide essential knowledge for their job. They should be motivated to give importance to these subjects and made aware of the technology that are used in the industry so that they can identify their area of interest and have the knowledge of the companies working in that area.

Prasad Jagtap
Learning Development
Specialist, BYJU'S

Abhilasha Kalmegh, Madhavi Jamankar and Kajal Khandore shared their company details and working atmosphere and how the disciplined culture of Pallotti has helped them in their professional career.

Dr.A.Werulkar (HOD, E&TC) appreciated all the alumni for their presence in the meeting and made an appeal to give inputs to the 3rd and final year students by sharing their experience of college life and professional life. He urged them to help the students to set career goals, mentor them for mini and major projects, share internship and placement opportunities.

GRADUATION CEREMONY

The institute organized its third Graduation Ceremony and Alumni Meet on 6th April, 2019. The Graduation ceremony received an overwhelming response from the 2017-2018 batches students. In all 651 alumni participated in the meet. The ceremony began with welcome address by Fr. Varghese Pullan, Chairman, The Nagpur Pallottine Society followed by the institute progress report presented by Fr. Dr. Paul Chandrankunnel, Director. The Chief Guest of the function Mr. Benny Augustine, Director Human Resource, Chief Ethics & Compliance Officer, Unisys, delivered the keynote address. He highlighted the rapid developments in technology and asked the graduates to prepare themselves for meeting the challenges. The college recently received NAAC 'A' grade as highlighted in the welcome address by Fr. Varghese Pullan.

The graduates as well as dignitaries clad in ceremonial gowns and cap filled the arena with grace and the event was witnessed by all the distinguished invitees and guests having an association with the institute since its inception. The graduates pledge was administered to the degree recipients by the Chief Guest Mr. Benny Augustine. An aggregate of 415 certificates were distributed to the postgraduates and graduates in the ceremony. The ceremony concluded with graduation caps flying high followed by a gala dinner.

ALUMNI ACHIEVEMENTS

Shiva Kakkar

Alumnus Shiva Kakkar being awarded Ph.D. from the hands of Mr. Kumar Mangalam Birla, Chancellor of the Birla Institute of Technology and Science and Chairman of Aditya Birla Group

Shiva Kakkar
Doctoral Scholar
Indian Institute of Management, Ahmedabad

Shiva Kakkar, alumnus from the foundation batch of the Department of Electronics & Telecommunication Engineering was awarded Ph.D. at 54th Annual Convocation of 'The Indian Institute of Management Ahmedabad (IIMA)' held on March 16th, 2019. The topic of thesis was, "The influence of perception of performance management system and regulatory focus on employee work engagement." Presently he is working as Assistant Professor at Goa Institute of Management. Before pursuing his Ph.D., he completed his PGDM from Birla Institute of Management Technology.

ALUMNI ACHIEVEMENTS

Ankit Acharya

*Key Account Manager
Strategic Segments,
Digital Energy, Schneider Electric.*

Ankit Acharya is an alumnus from Batch 2014, who has left an unfading mark on the history of department of E&TC with his energy and talent and it is fitting that he is working in Schneider Electric, a global specialist in energy management and automation. We congratulate him for receiving the certificate of successful completion of training received and appreciation based on project work done in building go to market strategy for power meters in OEM channels. We would also like to express our deep gratitude for his cooperation and contribution during College NAAC evaluation process.

Pooja Umate

We are very proud to share that one of our alumni, Ms. Pooja Umate (2017 Graduate) from the department of Electronics & Telecommunication Engineering has bagged numerous awards while undergoing her post graduate MBA studies at Pune. She won 'The Director Leadership Award', 'Most Popular Student Award' and 'All Rounder Student Award'. The institute is overjoyed by her achievements and wish her even more success in her future endeavours.

Alumnus Ankit Acharya receiving certificate for successful completion of training received and appreciation based on project work done, from Mr. Anil Chaudhry, Country President and Managing Director, Schneider Electric India.

ALUMNI TESTIMONIALS

Juhi Jais

*Software Engineer
Tech Mahindra*

Correctly defining the motto of St. Vincent Pallotti this is Juhi Jais (Batch-2015 passout). It's 2019, just 4 years after graduating from college yet the memories remain as the greenery around our college.

I still remember the first year crowd...Insight...Lectures...Exams...CR....SRC....I feel nostalgic as I write it down. Oh God! The life of "FIRST YEAR", the feeling that we are grownups now, yet getting pampered from lecturers was another great experience. I joined in August 2011 and the first ever event I hosted was 'Teachers Day', so much fun we had....actual introduction and friends were made that day....after that we never stopped.

The journey went on and the faculties were so supportive of things whether they be personal or professional, you just utter and you have the solution at least I had such instances many a time. Soon as we entered, within no time we were promoted to Department of E&TC in a year. That in itself was a beginning of another journey to achieve the milestone. I still remember "FESTRONIX" was then initiated by our batch, obviously after a lot pushing and support from faculty.

Every tradition has to start somewhere and I am proud I belong to the batch that initiated a lot more things. I was amazed to see different talents emerging out of our batch, not just our batch but Pallotti started to establish its name all over. As toppers of our batch we had offer from BSNL for on-field training and the college supported us to the way best. I suppose that continues now as well.

The days went on 'FESTRONIX..INSIGHT 2012', semesters passed and soon we were "SENIORS"-the proud wala feeling. As we grew the bond with college grew stronger and why it should not be! Spending 8 hours a day in college is spending 1/3 of your time...we became family.

I understand the college is known for its strictness but friends today this college and its environment has made me what I am, really I am proud of the fact that I know how to value time, respect people and follow deadline. That's exactly how the corporate world works. The values this college imbibes within you are inseparable and trust me they are positive.

Few days back I was just scrolling through YouTube and I found this Pallotti channel on YouTube .I was so happy, I just scrolled and scrolled and was mesmerized to see the progress the college is making. I also heard the news of students moving abroad to study along with faculties.

Guys while I am writing this I never want to stop...I have that dejavu..that flashback of things. All in all, Pallotti is the best thing that has happened to me due to several reasons which any book would not be enough to jot down.

SOME MEMORIES ARE UNFORGETTABLE, REMAINING EVER VIVID AND HEATWARMING.

Sumit Tahalani

*Entrepreneur
Product Development, R&D*

SVPCET is known for punctuality. I think because of college staff and management, I'm punctual in my work. College teachers and HOD Sir provided me an innovative platform in college, now I'm developing innovative products which are helping the nation. Special Thanks to Rajurkar sir because of his special efforts in classroom I found teaching to be a good career option. I can say that I'm doing my teaching job very well. Thank you Pallotti.
